DVDROM. EOS Camera Instruction Manuals Disk DVDROM EOS Camera Instruction Manuals Disk XXX Contains the following PDF manuals. Insert a card p.24 With the card's label facing toward the back of the camera, insert it into the card slot. Attach the lens p.32 White index Red index Align the lens'. Focus the subject p.35 Look through the viewfinder and aim the viewfinder center over the subject. Press the shutter button halfway, and the camera will focus the subject.<http://www.astronox.com/userfiles/decservice-700-user-manual.xml>

If visible spots still remain after the automatic sensor cleaning, having the sensor cleaned by a Canon Service Center is recommended. Creative Zone These modes give you more control for shooting various subjects. Program AE s Shutterpriority AE f Aperturepriority AE Manual exposure Basic Zone All you do is press the shutter button. Attaching the Strap Pass the end of the strap through the camera's strap mount eyelet from the bottom. Then pass it through the strap's buckle as shown in the illustration. Attach the battery. As shown in the illustration, attach the battery securely to the charger. To detach the battery, follow the above procedure in reverse. Recharge the battery. LCE12 For LCE12 As shown by the arrow, flip out the battery charger's prongs and insert the prongs into a power outlet. Battery Pack LPE12 is dedicated to Canon products only. Using it with an incompatible battery charger or product may result in malfunction or accidents for which Canon cannot be held liable. The camera can use an SD, SDHC, or SDXC memory card sold separately. UHSI Speed Class SDHC and SDXC memory cards can also be used. The captured images are recorded onto the card. Otherwise, the hinge may break. The number of possible shots depends on the remaining capacity of the card, imagerecording quality, ISO speed, etc. Also, never do any of the following while the access lamp is lit or blinking. You can shoot movies p.87. The camera turns on. You can shoot still photos. Follow the steps below to set the time zone first. Press the keys to select the number. Press so is displayed. Press the keys to set the number, then press. Returns to. Set the daylight saving time. Press the button to display the menu screen. The camera cannot be used with EFM lenses. Attaching a Lens Remove the caps. Remove the rear lens cap and the body cap by turning them as shown by the arrows. If you want to zoom, do it before focusing. Turning the zoom ring after achieving focus may throw off the focus.

Detaching the Lens While pressing the lens release button, turn the lens as shown by the arrows. Turn the knob left or right so that the AF points nine boxes in the viewfinder look sharp. If the camera dioptic adjustment still cannot provide a sharp viewfinder image, using Eseries Dioptic Adjustment Lenses sold separately is recommended. You can press the shutter button halfway. Then you can further press the shutter button completely. Pressing halfway This activates autofocus and the automatic exposure system that sets the shutter speed and aperture. The exposure setting shutter speed and aperture is displayed in the viewfinder 0. This is called the Quick Control screen. Press the button. The Quick Control screen will appear 7. Set the desired function. Press the. While looking at the LCD monitor, use the button, cross keys, and button on the back of the camera to operate the menus.. Press the button to display the menu screen. Select a tab. Press the keys to select a tab group of functions. When the card is formatted, all images and data in the card will be erased. Even protected images will be erased, so make sure there is nothing you need to keep. The card was formatted by a different camera or a computer. The card is full with images or data. A cardrelated error is displayed. Lowlevel Formatting Perform lowlevel formatting if the card's recording or reading speed seems slow or if you want to totally erase data in the card. Shooting Settings When you turn on the power, the shooting settings will be displayed. When your eye is near the viewfinder eyepiece, the displayoff sensor p.15 will turn off the LCD monitor to prevent glare. It also displays a description when you select a function or option on the Quick Control screen. Quick Control Sample display Use your finger to tap touch briefly and then remove your finger from the LCD monitor. By tapping, you can select menus, icons, etc., displayed on the LCD monitor.

Scale display Sample display Operations possible by dragging your finger on the screen Selecting a

menu tab or item after pressing the button Setting a scale control Quick Control Setting functions during Live View shooting. Set the Touch control. With Basic Zone modes, all you do is point and shoot while the camera sets everything automatically p.71. Also, to prevent botched pictures due to mistaken operations, advanced shooting function settings cannot be changed. The camera analyzes the scene and sets the optimum settings automatically. It also adjusts focus automatically by detecting whether the subject is still or moving p.51. Set the Mode Dial to. Aim any AF point over the AF point subject. Press the shutter button completely to take the picture. The captured image will be displayed for 2 sec. For a backlit subject, the flash may fire to help lighten the subject's dark areas. In the mode, while you press the shutter button halfway to focus a still subject, the focus will be locked. This is called "Live View shooting". For details, see page 73. Display the Live View image on the LCD monitor. Press the. In places where flash photography is prohibited such as in a museum or an aquarium, use the Flash Off mode. Shooting Tips Prevent camera shake if the numeric display in the viewfinder blinks. You can also select it from a list by pressing. Single shooting Shoot one image at a time. Continuous shooting While you hold down the shutter button completely, shots will be taken continuously. It also makes skin tones and hair look softer. Shooting Tips The further the distance between the subject and background, the better. The further the distance between the subject and background, the more blurred the background will look. For vivid blues and greens, and very sharp and crisp images. Shooting Tips With a zoom lens, use the wideangle end. When using the wideangle end of a zoom lens, objects near and far will be in focus better than at the telephoto end.

To make small things appear much larger, use a macro lens sold separately. Shooting Tips Use a simple background. A simple background makes small objects such as flowers stand out better. Shooting Tips Use a telephoto lens. The use of a telephoto lens is recommended for shooting from a distance. Set the Mode Dial to. Press the button. The Quick Control screen will appear. Select a shooting mode. Press the. Skin tones will look healthy. Shooting Tips Use the center AF point to focus. Aim the center AF point over the subject, then press the shutter button halfway to autofocus. The photo will look bright and vivid, making the food look delicious. Shooting Tips Change the color tone. Food photos with a reddish tinge usually make the food look more delicious. The candlelight color tones will be retained in the photo. Shooting Tips Use the center AF point to focus. Aim the center AF point in the viewfinder over the subject, then shoot. Prevent camera shake if the shutter speed in the viewfinder blinks. Using a tripod is recommended. Shooting Tips Use a wideangle lens and a tripod. When using a zoom lens, use the wideangle end to obtain a wide night view. However, the Handheld Night Scene mode enables you to shoot night scenes even while handholding the camera. Four shots are taken continuously for each picture, and the resulting image with reduced camera shake is recorded. When you take one picture in this mode, three continuous shots are taken at different exposures. This results in one image, with a wide tonal range, that has minimized the blockedup shadows caused by backlighting. The table on the next page shows the functions that can be set with the Quick Control screen in each Basic Zone mode. This is called "Live View shooting". If you handhold the camera and shoot while viewing the LCD monitor, camera shake can cause blurred images. Using a tripod is recommended. Press the button. The Live View image will appear on the LCD monitor.

In the mode, the scene icon for the scene detected by the camera is displayed on the upper left. By default, Continuous AF will take effect. If the subject is not a face, will be displayed. Since AF is not possible with a face detected near the edge of the picture, the. Aim the AF point over the subject and press the shutter button halfway. When focus is achieved, the AF point will turn green and the beeper will sound. If focus is not achieved, the area frame will turn orange. This is effective when you want to focus a particular subject. Display the Live View image. Press the button. The Live View image will appear on the LCD monitor. Although you can focus the target subject quickly, the Live View image will be interrupted momentarily during the AF operation. Aim the AF point over the

subject and press the shutter button halfway. The Live View image will turn off, the reflex mirror will go back down, and AF will be executed. No picture is taken. When focus is achieved, the AF point that achieved focus will turn green. This works in all shooting modes. Display the Live View image. Press the button. The Live View image will appear on the LCD monitor. The touch shutter does not work with the magnified view. The movie recording format will be MOV. For cards that can record movies, see page 3. Full HD 1080 Full HD 1080 indicates compatibility with High Definition featuring 1080 vertical pixels scanning lines. Autoexposure Shooting When the shooting mode is set to other than, autoexposure control will take effect to suit the scene's current brightness. Set the power switch to. Even if the camera does not feel too hot, prolonged contact with the same body part may cause skin redness or blistering. Images shot and saved with another device The camera may not be able to properly display images captured with a different camera, edited with a computer, or that have had their file names changed. Press the button. The last captured image or last image played back will appear.

Select an image. To view images starting with the last image, press the key. To view images starting with the first oldest image, press the. Play back the image. When you press the button, the last image captured will be displayed. The image will be magnified. If you hold down the button, the image will be magnified until it reaches the maximum magnification. Press the button to play back images. Browsing Images Swipe with one finger. With singleimage display, touch the LCD monitor with one finger. Touch the screen with two fingers spread apart, and pinch your fingers together on the screen. Each time you pinch your fingers, the singleimage display will change to the index display. Press the button to display an image. Select a movie. Press the keys to select a movie. In the singleimage display, the icon displayed on the upper left of the screen indicates a movie. Adjust the slow motion speed by pressing the keys. Slow motion The slowmotion speed is indicated at the upper right of the screen. First frame Displays the movie's first frame. There are two ways to do this. Downloading by Connecting the Camera to the Computer Install the software p.108 Use the provided interface cable to connect the camera to your computer. Use ImageBrowser EX. For details, refer to the Software Instruction Manual p.103. When downloading images from the camera to your computer using a card reader without using Canon software, copy the DCIM folder on the card to your computer. CELXXX XXX XXXXX XXXXX XXXXX XXXXX XXXXX Windows XXX XXX Mac OS X XXX XXX Note that the software provided with previous cameras might not support still photos and movie files shot with this camera. Do not connect the camera to your computer before you install the software. The software will not be installed correctly. When downloading and installing ImageBrowser EX, follow the steps below as with other EOS software included on the EOS Solution Disk.

Do not connect the camera to your computer before you install the software. The software will not be installed correctly. When downloading and installing ImageBrowser EX, follow the steps below as with other EOS software included on the EOS Solution Disk. If you experience any malfunctions, problems, or damage to the product, contact the nearest Canon Service Center or the dealer from whom you purchased the product. Follow the warnings below. Otherwise, death or Warnings serious injuries may result. This is to prevent electrical shock, excessive heat, fire, or corrosion. Do not use the equipment where there is flammable gas. This is to prevent an explosion or a fire. Otherwise physical injury Cautions or property damage may result. Do not use or store the product inside a car under the hot sun or near a heat source. The product may become hot and cause skin burns. Doing so may also cause battery leakage or explosion, which will degrade the performance or shorten the life of the product. For information on the compatibility with any products introduced after this date, contact any Canon Service Center. Please note not all services are available to every destination. It is also becoming rarer to receive a full paper user guide with your device as standard when purchased brand new, with many companies opting to provide a basic quick start guide and have the full guide available as a file available for download online. A full printed user guide is therefore very handy. As

part of our commitment to customer service this user guide printing service is offered to give you access to a physical copy of your devices user guide. We will print the most up to date official user guide for your device on A4 paper and this can be combined with other items or sold separately. What do you get A full official manufacturers userguide, printed on A4 or A5 paper and combbound.
